CONVERSATION

Conversation is the informal interchange of thoughts and opinions by way of spoken language. When it is automatic or one-sided, there is no conversation. Worthwhile conversation is spontaneous, it has flashes of wit and humor, and there is a contribution from the participants. Conversation with Dr. Johnson must have been difficult for the great one monopolized it and the participants were only pump primers whose usefulness ended when the question was put.

Not long ago a song bird appeared in our neighborhood. It had a beautiful repertory of nine notes which finally were reduced to six, but its conversation never changed. From dawn till dark the bird was busy with the same piece and if it stopped for breath, the listeners were in a nervous state akin to that of the wakeful person who could not go to sleep because the occupant of the room above had dropped one shoe but obstinately refused to drop the other. It would do no good to chop the tree down, but we did discuss offering the bird a reward to go away and bother somebody else.

I was thinking of the bird with the six monotonous notes, while enduring my regular morning bus ride to town, when I began to hear conversation between the two persons sitting next to me. One of the ladies was relating her personal ailments, ending thus, "I am all right if I lie on my back. It's only when I turn on my side....." The bus rolled on but in a few blocks came, "While I'm on my back I'm all right, but if I get on my side.....". Again I thought of the bird when once more came, "When I turn on my side I am uncomfortable, but if I lie on my back.....". Conversation is what you make it.

I. Anatomy; Histology

Am. J. Anat., 1942, 71: (July)

- WILLIAMS, W.L. Normal and experimental mammary involution in the mouse as related to the inception and cessation of lactation. 1-41.
- GRAFFLIN, A.L. Histological observations upon the porphyrin-excreting Harderian gland of the albino rat. 43-64.
- WUDLEY, J. The development of the ultimobranchial body of the fowl, *Gallus domesticus*. 65-97.
- RINGORN, A.R. Effects of continuous green and red light illumination on gonadal response in the English sparrow, *Passer domesticus* (Linnaeus). 99-116.
- SCHWIND, J.L. Spontaneous twinning in the amphibia. 117-51.

J. Morph., 1942, 71: (July)

- HELVIG, E.R. Unusual integrations of the chromatin in *Machaerocera* and other genera of the Acrididae, Orthoptera. 1-33.
- COR, W.L. Influence of natural and experimental conditions in determining shape of shell and rate of growth in gastropods of the genus *Crepidula*. 35-51.
- RICHTER, K.M. An experimental study of the cytology of human peripheral blood neutrophils and lymphocytes. 53-75.
- CH'EN, SHIH-TI. Differential chromosomes of *Arcyptera coreana shiraki*, order, Orthoptera. 77-103.
- FAWCETT, D.W. A comparative study of blood-vascular bundles in the Florida manatee, *Trichechus latirostris*, and in certain cetaceans and edentates. 105-33.
- RICHARDS, A.G., JR., & ANDERSON, T.F. Electron microscope studies of insect cuticle, with a discussion of the application of electron optics to this problem. 135-83.
- BORN, E.C. An analysis of neutron and x-ray effects on regeneration of the forelimb of larval *Amblystoma*. 185-219.

2. Anthropology; Ethnology

New Mexico Anthropologist, 1941, 5:

- GILLIN, J. Chatto's measurements; a footnote to western history. 3-6.
- KLOCKHOHN, C. Notes on Navajo Eagle Way. 6-14.
- SUMMARY of University of New Mexico field work in anthropology during the summer of 1941. 14.
- BRAND, D.D. A brief history of Araucanian studies. 19-35.
- BRAND, D.D. A tri-lingual text by Martin Collis Humequillar. 36-52.

5. Bacteriology; Parasitology

J. Bact., Balt., 1942, 43: (June)

- HARTSELL, S.E. The effect of peptone and o-aminobenzoic acid on the growth of *Salmonella*. 776.
- TRELLER, P.C. The use of tungsten micro-needles in single cell isolation. 777.
- ROBERTS, J.L. Cytological changes occurring in *Clostridium pasteurianum* during spore formation. 777

- MURRAY, H.C. A preliminary report upon aerobic decomposition of cellulose by thermophilic bacteria. 777.
- REYNIERS, J.A. Rearing of a caesarian-born *M. rhesus* monkey under sterile conditions: a preliminary report. 778.
- ROBINSON, E.D., & GENUNG, E.F. The effect of incubation temperature upon certain organisms cultured in cream. 778.
- SHERWOOD, M.B. The decrease in bactericidal activity of disinfectants of the quaternary ammonium type in the presence of agar. 778.
- SHERWOOD, M.B. The use of filter paper in an improved method for testing fungicides. 779.
- MUIR, R.D. Respiratory enzymes of bacteria in relation to different gaseous environments. 779.
- SCHIEFF, G.J., & KUEHNER, R.L. An acetylcholine-producing enterococcus. 779.
- PLASTRIDGE, W.N., & CUNNINGHAM, L. Streptococcus agalactiae-agglutinins in bovine blood serum and whey. 779.
- PIERCE, C.H. *Streptobacillus moniliformis*, its associated L₁ form, and other pleuropneumonia-like organisms. 780.

6. Biology; Embryology

Arch. Biol., Par., 1941, 52:

- GRENADE, A. Le développement du système nerveux de la vesicule biliaire; les complexes neuro-hépatiques. 419-72.
- VAN CAMPENHOUT, E. Participation de l'épithélium à la constitution des plexus nerveux intrinsèques de l'embryon de vache. 473-508.
- DE NUYLDER, C. Corpuscules sensitifs dans les veines du rein de la souris. 509-21.
- LEVI, G., & CHEVREMENT, M. Transformations structurales des éléments des muscles squelettiques pendant leur croissance in vitro; relations entre mitochondries et myofibrilles. 523-51.

Biol. Bull., 1942, 82: (June)

- BALLARD, W.W. The mechanism for synchronous spawning in *Hydra actinia* and *Pennaria*. 329-39.
- GOLDIN, A. A quantitative study of the interrelationship of oxygen and hydrogen ion concentration in influencing *Tubularia* regeneration. 340-6.
- WILLIAMS, C.M. The effects of temperature gradients on the pupal-adult transformation of silkworms. 347-65.
- VON DACH, H. Respiration of a colorless flagellate, *Astasia klebsii*. 356-71.
- TOPPING, F.L., & FULLER, J.L. The accommodation of some marine invertebrates to reduced osmotic pressures. 372-84.
- LANSING, A.I. Increase of cortical calcium with age in the cells of *Eloidea canadensis*. 395-91.
- LANSING, A.I. Increase of cortical calcium with age in the cells of a rotifer, *Euchlanis dilatata*, a planarian, *Phagocata* sp., and a toad, *Bufo fowleri*, as shown by the microincineration technique. 392-400.
- LEE, R.E. The hypophysis of the broad-billed swordfish, *Xiphias gladius* L. 401-12.
- LOOSANOFF, V.L., & ENGLE, J.B. Accumulation and discharge of spawn by oysters living at different depths. 413-22.

- ORMSBEE, R.A. The normal growth and respiration of *Tetrahymena geleii*. 423-37.
- GRAVE, B.H. The sexual cycle of the shipworm, *Teredo navalis*. 438-45.
- METZ, C.B. The inactivation of fertilizin and its conversion to the univalent form by x-rays and ultraviolet light. 446-54.
- MORGAN, T.H. Do spermatozoa penetrate the membrane of self-inseminated eggs to *Ciona Styela*? 455-60.
- WOODARD, T.M., JR. Behavior of the nurse-cells of *Littorina irrorata*, Say. 461-6.

9. Cardiovascular System

Am. Heart J., 1942, 24: (July)

- LANGENDORF, R., & KATZ, L.N. Unusual arrhythmias due to multiple sites of conduction delay in the A-V junction in cases with a subsidiary ventricular pacemaker located above the bifurcation of the common bundle. 31-40.
- HELLWIG, C.A. Atheromatosis of the mitral valve. 41-9.
- LANDOWNE, M. Dynamics of blood flow in thromboangiitis obliterans. 50-68.
- MOTE, C.D., & CARR, J.L. Dissecting aneurysm of the aorta. 69-87.
